

Dear Sirs: I value my XM radio services. I pay for this service because I use it daily and enjoy it. I like the ability to choose my music by type and to have commercial free listening. WWhen traveling i am not forced to find alternative stations or listen to one's with music I don't like. I was especially happy when XM added the instant traffic and weather. I can choose to listen to the service when I want and not when the fm broadcasters decide I should get it. I respectfully urge the FCC to reject the NAB petition 04-169 and support XM's ability to provide the type of programming that I am willing to pay for.
